

CHAABANE BOUSSADIA

Sousse, Tunisia • +216 99 641 742 • chaabaneboussadia@gmail.com • linkedin.com/in/chaabaneboussadia • github.com/Chaabane2k03

PROFESSIONAL SUMMARY

Software Engineering student with full-stack and cloud experience across 3 internships in backend architecture, system design, and AI integration, working across React/Node.js, PostgreSQL, and AWS. AWS-certified (3x: Solutions Architect – Associate, Cloud Practitioner, AI Practitioner). Track record includes cutting release effort and HR processing time by ~40% and eliminating recurring licensing costs through custom-built features.

PROFESSIONAL EXPERIENCE

Software Engineer Intern — Galylio AI

Jun 2026 – Aug 2026

Ain Zaghouane Nord, Tunis

- Re-engineered Tdiscount's e-commerce platform end-to-end on the PERN stack (PostgreSQL, Express, React, Node.js), replacing paid plugins (Dokan multivendor, Elementor Pro) with custom-built page customization and admin management features — eliminating approximately 1,500+ TND/year in licensing costs and giving the client full ownership of platform customization.
- Designed a transactional backend architecture with PostgreSQL, Redis caching, and ACID-compliant transactions, layered with authentication/authorization (RBAC), to ensure data consistency and secure concurrent operations.
- Engineered an agentic AI pipeline using LLM-based column matching to automatically map inconsistent CSV schemas during product imports, eliminating manual template matching for non-standard client files.
- Automated CI/CD pipelines with GitHub Actions to publish Docker images and deploy releases, cutting release effort by 40%+.

Software Engineer Intern — DRÄXLMAIER Group

Jul 2025 – Aug 2025

ZI Sidi Abdelhamid, Sousse

- Developed a low-code HR platform using Power Apps to centralize and automate productivity-bonus (prime) generation, with Power Automate replacing manual Excel workflows — eliminating back-and-forth between HR and department heads and cutting processing time by ~40%.
- Prototyped a Kafka-based notification architecture to track CDI (permanent contract) probationary-period status, using cron jobs and time-series databases to automate monitoring HR previously handled manually.

Web Developer Intern (Initiation) — Satoripop Inc.

Jul 2024 – Aug 2024

Sousse, Tunisia

- Created a meeting-scheduling web app using Angular and Spring Boot as a training project, reducing scheduling conflicts through automated availability checks (REST APIs, component architecture, data binding).

PROJECTS

PFEX — Final-Year Project Management Platform

- Co-architected and shipped PFEX with equal ownership across frontend and backend, an internal platform for FST's Computer Science Department managing 360+ final-year project (PFE) subjects annually — replacing a fully manual process.
- Reduced scheduling conflicts by roughly 30% and cut organizational overhead by centralizing procedures into one system, eliminating reliance on third-party tools and duplicate paper-based tracking.
- Delivered dashboards and analytics giving department heads real-time insight into PFE status and assignments, cutting paper usage by close to 50% across the department.

EDUCATION

Faculty of Sciences of Tunis (FST) — Tunis El Manar University

Sep 2022 – Oct 2027 (Expected)

- Engineering Degree in Software Engineering — GPA: 15.94/20
- Relevant coursework: Software Architecture, Distributed Systems, Data Analysis, Algorithms, AI

Tahar Sfar High School

Jun 2022

- Baccalaureate, Major in Mathematics — Mention Très Bien (17.3/20)

CERTIFICATIONS

Earned: AWS Certified Solutions Architect – Associate • AWS Certified AI Practitioner • AWS Certified Cloud Practitioner • DataCamp Associate Data Scientist Certification • IBM AI Engineering Professional Certificate • GitHub Actions — Microsoft

In Progress: Google Associate Cloud Engineer

LEADERSHIP & ACTIVITIES

- OPTIMA Junior Enterprise — Junior Consultant: Delivered and maintained client-facing web applications across multiple projects as part of a student consulting team.
- ATIA (Tunisian Association of Artificial Intelligence): Won 3rd place in an AI hackathon; instructed peers on Deep Learning fundamentals.
- FST Startup Nation: Won 1st place in an entrepreneurial hackathon; served as General Secretary of the club.

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, Python, SQL | Frontend: React.js, Next.js, Angular, Tailwind CSS

Backend: Spring Boot, Node.js, Flask, Express.js | Databases: PostgreSQL, MySQL, MongoDB, Redis, Oracle, Elasticsearch

Cloud & DevOps: AWS, Docker, GitHub Actions, Jenkins, LocalStack, Nexus Repository, SonarQube

AI/ML: LangChain, CrewAI, PyTorch, TensorFlow, scikit-learn | Concepts: System Design, Software Architecture, Microservices, Agentic AI Integration
